Where Complex Challenges Meet Smart Solutions

Water Control Solutions

Providing effective water control solutions for commercial, institutional, and industrial applications can be overwhelming and make it difficult to implement an effective design. Along with our partners ENAD has provided and installed State-of-the-art waterway debris cleaning and control systems that have kept water flowing in the most extreme conditions – 24/7 they've been proven to dramatically increase flow efficiency, reduce operations and maintenance costs, and improve safety and morale at water intakes, hydroelectric dams, irrigation canals, and fish ladders.

ENAD is highly experienced in the installation of water control infrastructure and water management systems. ENAD's partnerships, experience in engineering and design along with our team of experts provides our clients with the expertise and experience they desire when developing systems.

Energy by Native American Design

Native American Owned & Operated

Past Projects Include:

Armenta Plant intake, Bloomfield, NM - ENAD Furnished labor, supervision, materials, supplies, tools, equipment, and expertise necessary for design, assembly, delivery, and installation in the replacement of the existing trash rake with a new rake to remove debris at the Armenta Plant intake.

Cold Springs Power Plant, ID - Refurbishment and replacement of Trash Rake system Supply, deliver, and provide technical assistance with installation and start up for a complete trash rake system.

Colorado River Irrigation Project - ENAD was contracted to project involved maintenance and stabilization of canal banks Bank Stabilization / Maintenance - Providing irrigation water to 80,000 acres of prime farmland on the Colorado River Indian Tribe (CRIT) Reservation.
